

Product Specification and Technical Data

PRODUCT: BG Battery Cleaner & Leak Detector

PART NO.: 885

TEST DATA:	Test	ASTM Test Method	Typical Test Results
	Odor		Mild Ammonia
	Appearance	Visual	Yellow Foam
	Specific Gravity (H ₂ O = 1)	D 1298	1.00
	Boiling Point	D 86	100°C (212°F)
	Solubility in water, %	Visual	100

PROBLEM: With today's electronically-controlled vehicles, a battery is responsible for more than just starting power. Consistent power is increasingly essential for proper performance in modern vehicles. However, battery terminals, cables, and carriers are vulnerable to corrosion build-up, which can sap the power from a battery.

SOLUTION: BG Battery Cleaner & Leak Detector is an easy and effective way to clean batteries and free battery terminals, cables, and carriers from power-sapping corrosives. This product also contains an unique acid detecting ingredient that turns red in the presence of acid, warning of the need for additional cleaning or of the presence of a crack or leak around the terminals.

USAGE: Apply BG Battery Cleaner & Leak Detector liberally on areas of accumulated corrosion. Allow to soak 5-10 minutes. Rinse off with clean water. Apply BG Battery Terminal Protectors on battery terminals to prevent corrosion.

BG Products, Inc. accepts no liability for excessive use or misuse of this product.
